Education

- **Maharaja Agrasen Institute of Technology** — Delhi, India
  B.Tech in Information Technology (Minor in AI & ML) — CGPA: 8.0/10.0 — *Nov 2022 – Jun 2026*
  - **Relevant Coursework:** DSA, OOP, DBMS, Operating Systems, Computer Networks

Technical Skills

- **Languages:** C++, JavaScript, TypeScript, Python, SQL
- **Frontend:** React.js, Next.js, Tailwind CSS
- **Backend:** Node.js, Express.js, NestJS
- **Databases:** MongoDB, MySQL
- **Cloud & Data Engineering:** Azure Data Factory, Azure Databricks, Delta Lake, AWS, Microsoft Azure
- **Tools:** Git, GitHub, Postman

Experience

- **Nagarro** — Gurugram, India
  Data Engineer Trainee — *Feb 2026 – June 2026*
  - Worked on data processing and transformation tasks using Python and SQL for structured and semi-structured datasets.
  - Built and optimized scalable data pipelines on Databricks to improve data ingestion and processing efficiency.
  - Gained hands-on exposure to Azure Cloud services for data storage, compute workflows, and pipeline orchestration.
- **Nagarro** — Remote
  Trainee-Client: Suzuki Digital — *Jun 2026 – Present*
  - Developing enterprise applications for Suzuki dealers, service teams, and customers using **Next.js**, **NestJS**, and **TypeScript**.
  - Building reusable frontend components and RESTful backend APIs following scalable architecture and clean coding practices.
  - Collaborating with product managers, QA engineers, and developers in an Agile environment to deliver production-ready features.

Projects

- **CoinPulse (GitHub)**
  Tech Stack: *Next.js, TypeScript, Tailwind CSS, CoinGecko API, Lightweight Charts*
  - Developed a cryptocurrency analytics platform using **Next.js** and **TypeScript** with Server-Side Rendering (SSR) and Static Site Generation (SSG) for improved performance and SEO.
  - Integrated the CoinGecko API to fetch real-time cryptocurrency prices, historical OHLC data, market statistics, and coin metadata with live polling for up-to-date information.
  - Implemented search functionality, pagination, interactive candlestick charts using Lightweight Charts, reusable UI components, and loading skeletons to enhance user experience and responsiveness.
- **NYC Taxi Data Transformation Pipeline**
  Tech Stack: *Azure Data Factory, Azure Databricks, PySpark, Azure Data Lake Storage Gen2, Delta Lake*
  - Designed and implemented an end-to-end ETL pipeline to ingest, transform, and process NYC Taxi trip data using Azure Data Factory, Azure Databricks, and PySpark.
  - Built parameterized ADF pipelines using Copy Activity, Get Metadata, Lookup, ForEach, Mapping Data Flow, and Notebook Activity to automate ingestion and transformation workflows.
  - Configured trigger-based execution to detect newly added files, execute Databricks notebooks, and load curated data into Delta Lake following the Medallion Architecture (Bronze, Silver, Gold).
  - Performed data cleansing, validation, and aggregations using PySpark while enabling automated, scalable, and fault-tolerant data processing.

Achievements & Certifications

- **TechForChange – Nasscom Foundation:** Ranked in the **Top 20 out of 700+ teams** for building a tech-for-good solution. Certificate
- **InnovateX Winner:** Secured **1st place** among **100+ teams**; finalist in national-level hackathons including **Samsung Solve**, **HackOn with Amazon**, and **Walmart Sparkathon**. Certificate “‘latex
- **Data Structures & Algorithms:** Solved **350+** coding problems on **LeetCode** and **GeeksforGeeks**, strengthening problem-solving skills in arrays, trees, graphs, dynamic programming, and advanced algorithms. “‘
